AUTHOR	Lee, Beatrice C., Ed.
TITLE	Rankings of the States, 1970.
INSTITUTION	National Education Association, Washington, D.C.
REPORT NO	RR-1970-R1
PUB DATE	70
NOTE	76p.
AVAILABLE FROM	Publications Sales Section, National Education Association, 1201 Sixteenth Street, N.W., Washington, D.C. 20036 (Stock No. 435-25430, $1.50, Quantity Discounts)
EDRS PRICE	EDRS Price MF-$0.50 HC Not Available from EDRS.
DESCRIPTORS	Academic Achievement, Average Daily Attendance, Average Daily Enrollment, *Census Figures, *Educational Finance, Educationally Disadvantaged, Expenditures, Family Income, Instructional Staff, Literacy, Population Trends, State Federal Aid, *State Surveys, *Statistical Data, Student Teacher Ratio, *Tables (Data), Tax Support, Teacher Salaries

ABSTRACT

This report consists of tables that rank the States according to 128 separate data items. The information is useful for interpreting and evaluating various aspects of State school systems. The latest available figures are used. However, some are estimates and others are based on sampling studies. National totals are shown in most tables. Items covered in the tables are population; enrollment and attendance; teachers; educational attainment; general financial resources; governmental revenue, expenditures, and debt; school revenue and expenditures; and miscellaneous items. A 25-entry bibliography of the data sources and an index are included. (For the 1969 rankings, see ED 032 627). (DE)

FOREWORD

The 128 ranked lists of state data that constitute this Report present information that may be used in understanding, explaining, interpreting, and possibly evaluating various aspects of state school systems. The range of items, however, illustrates the difficulty of making a defensible single judgment of the effort or the effectiveness of a given state in working on its educational problems. These rankings are not suitable for combining into composite rankings for the 50 state school systems.

It is hoped that the information presented in this Report will be useful in the improvement of education.

GLEN ROBINSON
Director, Research Division

INTRODUCTION

The figures used in the rankings presented in this Report are the latest available. Some are estimates, prepared in advance of detailed reports, and hence are subject to revision. Some are based on sampling studies, for which measures of sampling variability are not recorded here. Readers are cautioned against making conclusions based on slight differences among states in rankings on a specific item, and against using the data or rankings in trend research since generally the series is not revised when final figures become available. However, revised 1968-69 estimates for certain items are given along with 1969-70 estimates.

The national totals shown in most tables include the District of Columbia; but because the District comprises a single urban school system, and hence is not comparable to state school systems, figures for it are not shown separately. Data for American Samoa, Canal Zone, Guam, Puerto Rico, and Virgin Islands, whenever they are available, are given in a separate listing beginning on page 67.

All dollar amounts for Alaska should be reduced by one-fourth to make the purchasing power of Alaska figures generally comparable to figures reported for other areas of the United States. In the tables where this applies, the appropriate figure and rank for Alaska are given in parentheses.

When the figures for two or more states are identical, the states are listed alphabetically and given the same rank; the appropriate number is then picked up with the next state in rank. The numbers at the bottom of each table refer to items in the list of references and to the page from which the basic data were obtained.

POPULATION

1--Estimates of Total Resident Population, July 1, 1969 7

2--Percent Change in Total Resident Population, April 1, 1960, to July 1, 1969 7

3--Net Total Migration Rate, 1960 to 1967 7

4--Estimated School-Age Population (5-17), July 1, 1969 8

5--Estimated School-Age Population (5-17) as Percent of Total Resident Population, 1969 8

6--Percent of Population Aged 21-64 in 1968 8

7--Number of School-Age Children (5-17) per 100 Adults Aged 21-64 in 1968 9

8--Percent of Population Aged 65 and Older, July 1, 1968 9

9--Percent Increase in Population 65 Years of Age and Older, 1960 to 1968 9

10--Number of Live Births per 1,000 Population, 1968 10

11--Population per Square Mile, 1969 10

12--Percent of Population That Is Urban, December 31, 1968 10

Definitions

Net total migration rate: number of migrant persons per 100 midperiod population.

Population (total): total resident population; it includes persons in the Armed Forces stationed in each area.

School-age population: population aged 5 through 17, inclusive.

Urban population: persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in states other than the New England states, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more.

1--Estimates of Total Resident Population, July 1, 1969

1.	California	19,443,000
2.	New York	18,321,000
3.	Pennsylvania	11,803,000
4.	Texas	11,187,000
5.	Illinois	11,047,000
6.	Ohio	10,740,000
7.	Michigan	8,766,000
8.	New Jersey	7,148,000
9.	Florida	6,354,000
10.	Massachusetts	5,467,000
11.	North Carolina	5,205,000
12.	Indiana	5,118,000
13.	Virginia	4,669,000
14.	Missouri	4,651,000
15.	Georgia	4,641,000
16.	Wisconsin	4,233,000
17.	Tennessee	3,985,000
18,	Maryland	3,765,000
19.	Louisiana	3,745,000
20.	Minnesota	3,700,000
21.	Alabama	3,531,000
22.	Washington	3,402,000
23.	Kentucky	3,232,000
24.	Connecticut	3,000,000
25.	Iowa	2,781,000
26.	South Carolina	2,692,000
27.	Oklahoma	2,568,000
28.	Mississippi	2,360,000
29.	Kansas	2,321,000
30.	Colorado	2,100,000
31.	Oregon	2,032,000
32.	Arkansas	1,995,000

24--Average Daily Membership as Percent of School-Age Population, 1969-70 16

25--Average Length of Public-School Term in Days, 1965-66 16

26--Percent of Elementary- and Secondary-School (Public and Private) Enrollment Participating in Federally Subsidized School Lunch Program (Indemnity Plan), 1968 . 16

Definitions

Average daily attendance: average of pupils attending when schools are actually in session.

Average daily membership: an average of the pupils belonging, those present plus those absent, when schools are actually in session.

Average length of school term: computed by dividing aggregate days attendance by average daily attendance; not a legal term.

Basic administrative unit: the local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

Enrollment, cumulative: a cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted; kindergartens are included in elementary-school enrollment; junior high schools are included in secondary-school enrollment; junior colleges are omitted.

Enrollment, fall: the count of the pupils registered in the fall of the school year, usually October; kindergartens are included in elementary school, and junior high schools are included in secondary school; junior colleges are omitted.

Definitions

Full-time equivalence: the amount of employed time required in a part-time position expressed in proportion to that required in a full-time position, with "1" representing one full-time position. It is derived by dividing the amount of employed time required in the part-time positions by the amount of employed time required in a corresponding full-time position.

Instructional staff in local public schools: number of positions, not the number of different individuals occupying the positions during the school year. Includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) which are in the nature of teaching or the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior-college staff.

Instructional staff in higher education: those engaged in teaching and related academic research in colleges and universities, including those in hospitals, agricultural experiment stations, and farms.

Non-instructional staff in higher education: cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

Non-instructional staff in local schools: administrative and clerical personnel, plant operation and maintenance employees, bus drivers, lunchroom, health, and recreational personnel engaged by school systems.

Salary: average or arithmetic mean.

Definitions

High-school graduate: a person who receives formal recognition from the school authorities for completing the prescribed high-school course of study; excludes persons granted high-school equivalency certificates.

Illiteracy: inability to read and write a simple message either in English or in any other language. Not to be confused with functional illiteracy, a term used by the Army in World War II to refer to persons who were incapable of understanding the kinds of writtern instructions that are needed for carrying out basic military functions or tasks. Since that time the term functional illiterate has commonly been used to denote a person who has completed less than five years of schooling.

65--Percent of Households with Cash Incomes of $10,000 or More in 1968 35

Definitions

Disposable personal income: estimates of disposable personal income are obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

Household: a unit which includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

Net effective buying income: same as disposable personal income.

Personal income: state personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes non-monetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions, private trust funds, and private pension, health, and welfare funds.

78--Per-Capita Local Tax Collections, 1967-68 41
79--State Tax Revenue in Fiscal 1968 as Percent of Personal Income in 1967 41

Definitions

General revenue: all revenue of a government except the kinds of revenue classified as utility revenue, liquor stores revenue, and insurance trust revenue. All tax collections and intergovernmental revenue, even if designated for insurance trust or local utility purposes, are classed under general revenue.

Property taxes: taxes conditioned on ownership of property and measured by its value.

Revenue from own sources: all revenue of a government (taxes and other) except intergovernmental revenue.

Taxes: compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

90--Local Public-School Revenue as Percent of State and Local School Revenue, 1969-70 47

Definitions

Revenue receipts (NEA estimates): includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments, receipts from taxes levied for school purposes, income from permanent school funds and endowments, income from leases of school lands, interest on bank deposits, tuition, gifts, etc. Amounts which increase the school indebtedness or which represent exchanges of school property for money are excluded. Revenue receipts from federal sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.) Revenue receipts from state sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public-school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the cost of textbooks, buses, supplies, etc. purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public-school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included. Revenue receipts for public-school purposes from local, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public-school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts, and tuition and fees received from patrons.

99--Per-Capita Long-Term Debt of State and Local Governments, 1967-68 52

Definitions

Debt: all long-term credit obligations of the government and its agencies, and all interest-bearing short-term (i.e., repayable within one year) credit obligations. Includes judgments, mortgages, and "revenue" bonds, as well as general obligation bonds, notes, and interest-bearing warrants. Excludes non-interest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from employee-retirement funds. Full Faith and Credit Debt is long-term debt for which the credit of the government, implying the power of taxation, is unconditionally pledged. Includes debt payable initially from specific taxes or nontax sources, but representing a liability payable from any other available resources if the pledged sources are insufficient. Nonguaranteed Debt consists of long-term debt payable solely from earnings of revenue producing activities, from special assessments, or from specific nonproperty taxes. Net Long-Term Debt is total long-term debt outstanding minus Long-Term Debt Offsets.

Direct expenditure: payments to employees, suppliers, contractors, beneficiaries, and other final recipients of governmental payments--i.e., all expenditure other than Intergovernmental Expenditure.

Expenditure: all amounts of money paid out by a government--net of recoveries and other correcting transactions--other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

General expenditure: all expenditure of a government other than utility expenditure, liquor stores expenditure, and insurance-trust expenditure.

Health: health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included here.

Highways: streets, highways, and structures necessary for their use, street lighting, snow and ice removal, toll highway and bridge facilities, and ferries.

Hospitals: establishment and operation of hospital facilities, provision of hospital care, and support of other public or of private hospitals. However, see Public Welfare concerning vendor payments under welfare programs.

Net long-term debt: total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, which are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

Police protection: preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

Public welfare: support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include: Cash Assistance Payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its Hospitals and Health agencies are classed under those headings.

118--State Direct Expenditures for Public Welfare and Correction as Percent of State Direct Expenditures for All Education, 1968 61

Definitions

Average daily attendance: average of pupils attending when schools are actually in session.

Average daily membership: an average of the pupils belonging, those present plus those absent, when schools are actually in session.

Current expenditures (USOE and NEA series): all amounts spent at all levels of administration--state, intermediate, and basic local--for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education; employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public-school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

Education: provision or support of schools and other educational facilities and services. The Local Schools category comprises all direct expenditure by local governments for education, other than any direct spending for institutions of higher education, and any direct state government spending for operation of or facilities and supplies for elementary and secondary public schools. Institutions of Higher Education includes facilities and activities of all educational institutions beyond the high-school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These educational categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis. Other Education includes all federal expenditure for education (with the service academies, however, classified as part of National Defense and International Relations), state supervision of schools and colleges, and state tuition grants, fellowships, aid to private schools, and educational programs for the handicapped, adults, veterans, and other special classes.

Personal income: state personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions, private trust funds, and private pension, health, and welfare funds.

INDEX

Numbers refer to the tables.

Average daily attendance:
  expenditures per pupil, 107, 109
  expenditures per pupil, increase in, 112
  expenditures per pupil as percent of national average, 108, 110
  expenditures per pupil as percent of personnel income, 111
  as percent of cumulative enrollment, 20
  percent in average daily membership, 22
  public-school revenue per pupil, 80, 81
  total, 19
Average daily membership:
  expenditure per pupil, 113, 114
  as percent of average daily attendance, 22
  as percent of enrollment, 23
  as percent of school-age population, 24
  personal income per child, 57
  total, 21

Births:
  rate, 10

Crimes:
  change in rate, 128
  number per 100,000 population, 127

Deaths:
  infant death rate, 126
Dentists:
  number per 100,000 population, 125

Educational attainment:
  median school years completed by adults, 46
  percent of ninth-graders graduating from high school, 48
  percent of population illiterate, 47
  percent of Selective Service draftees failing mental tests, 50, 51
Employment:
  government employees as percent of non-agricultural employees, 123
  number of federal civilian employees per 1,000 population, 121
  number of government employees per 1,000 population, 122
Enrollment:
  as percent of school-age population, 16
  percent in average daily attendance, 20
  percent in average daily membership, 23
  percent participating in school lunch program 26
  public-school, percent change in, 17
  public-school as percent of total school enrollment, 18
  total public-school, 14, 16

Federal government:
  expenditure per pupil in vocational programs, 115
  number of civilian employees per 1,000 population, 121
  percent of school revenue from, 88, 89
  state acreage owned by, 120
Fire protection:
  per-capita state and local government expenditures, 96

Health and hospitals:
  birth rate, 10
  infant death rate, 126
  number of dentists per 100,000 population, 125
  number of physicians per 100,000 population, 124
  per-capita state and local government expenditures, 94
High-school graduates:
  increase in number of, 49
  as percent of ninth-graders, 48
Higher education:
  per-capita state and local government expenditures for, 105
  per-capita state expenditures for, 104
Highways:
  per-capita state and local government expenditures, 97

Local governments:
  per-capita property tax revenue, 73

  per-capita tax revenue, 78
  percent of school revenue from, 84, 85
  property tax revenue as percent of state-local property tax revenue, 75

Personal income:
